

PAPER
ROBOTS
1999.COM

INSTRUCTIONS:

STEP 1: Print. Designed to fit on standard 8.5 x 11 inch paper and to be printed with any printer. A thick matte paper works best for extra sturdiness. Also, draw on any facial expressions or cool art at this time.

STEP 2: Punch. Using an awl or pen, lay the printed page on a soft surface (such as the carpet) and poke out the marked holes. It is easier to do it now than after the pieces are cut out.

STEP 3: Cut. Using your best pair of scissors and a steady hand, cut out all the limbs and shapes.

STEP 4: Glue. Fold the pieces along the designated fold lines and add a touch of glue to the white tab areas of each piece.

STEP 5: String. Cut some rubber bands (or wire or fishing line) and use them to string together the various limbs. Be sure to tie a knot on each end so it doesn't slip through the holes you punched earlier. A bent staple makes a great sewing needle for threading.

STEP 6: Enjoy! Now take a photo of your paper creation and send it to us at PaperRobots1999.com!

Cut and assemble pieces as shown.

Glue wings to head and calves.

Slide torso into chest.

Glue head to neck.

String together:

shoulders + chest + torso + neck;

wings + shoulders + arms;

arms + forearms;

torso + legs;

knees + legs + calves;

calves + feet.

Glue hips to legs.
